Python 3.X version course content:

-->Introduction to Python (or) Overview of Python

-->Operators in python

-->conditions in python

-->Loops in Python

-->Collections in Python (OR) DataStructures In python

-->Functions in Python

-->File Handling In python

-->Modules In python

-->Packages In python

-->Exception Handling In python
****

Advanced concepts of Python:

-->OOPS(Object oriented programming)
*Polymorphism
*encapsulation
*Inheritance
*Abstraction

-->Regular Expressions

-->MultiThreading

-->Iterators

-->Generators

-->Decorators

-->DataBase connections

-->CSV Module

-->JSON module

-->Overview of data analytics and visulaziation with Python Libraries.
